THE STATEWIDE FAMILY CENTERED HIV CARE NETWORK

The primary purpose of the Family-Centered Care Network is to provide comprehensive, culturally competent, coordinated care for women, children, youth and families with HIV infection throughout the State of New Jersey. The Network offers HIV specialty care, family medical case management, access to clinical drug trials, referral and follow-up services, outreach, counseling and testing.

PROGRESS AND GROWTH OF THE NETWORK

Since 1988, the Network has focused its efforts on developing family centered care facilities designed to provide or arrange for comprehensive treatment for women, children, youth and families infected with or affected by HIV disease. The centers have become highly skilled in providing psycho-social services, and medical and nursing care to families dealing with HIV as a chronic illness. Over 2,000 families are receiving services at seven sites throughout the State of New Jersey.

SERVICES AVAILABLE AT NETWORK CENTERS

* HIV/AIDS specialty care
* General medical care and physical examinations
* Laboratory tests including free rapid testing for HIV
* Mental health care, counseling, and psychological support
* Participation in adult and pediatric clinical trials
* Coordination of hospital and home care for HIV-positive clients
* Family referrals to appropriate medical and community-based care
* Gynecology care
* Referrals to other specialty care services (i.e. Dental care, eye care, nutrition counseling, etc.)
* Adolescent age-appropriate programs
* Medical case management and social support services
